

Pelvic Tilt

- On a padded surface, get on all fours with your knees under your hips and your wrists under your elbows
- Tighten your abdominal muscles, and round your back, pushing your back towards the ceiling. Return to the start position.
- Now, arch your back, tightening your back muscles as you lower your belly towards the floor. Return to the start position.
- This pattern continues, arch to round and back again for 30-60 seconds
- This is an active motion, not just a stretch. Really focus on tightening the appropriate muscle during each movement.
- Don't sag in your shoulders, actively push your elbows down, keeping your eyes to the floor

- Hold this position for 30 seconds, or as long as you are able. Rest for 30 seconds and repeat 5-10 times
